

We are really pleased to be welcoming you back into school. We can't wait to catch up with you all and help you with your learning. Coming back to school is not something to worry about. We hope you are looking forward to it!

When you come back into school there will be lots of changes. We have to make sure the school is as safe as it can be and there are new rules we must follow.

- You will be asked to come in a different entrance
- You will be asked to wash your hands frequently and there will be bins to put your tissues in
- You may be asked to have your temperature taken
- There are some places in school that you will not be allowed to go
- There will be a one way system around the school site
- Lunch and breaks will be at a different time and you may be eating in your classroom
- You might not have your usual teacher for some lessons
- You will only be allowed to spend time with the other pupils in your year group
- Your school day will be shorter

Change Triangle

At St Dominic's School we use the Change Triangle to show you when there is a change to the school. Here is the Same Square! This is to reassure you that there are some things that will still be the same.

- Staff will always be pleased to see you and happy to help
- You will still be able to go outside for break and lunch times in certain areas
- You will still get help with your learning and support with your work
- You will be able to talk about things that are worrying you

Same Square

There are some new Social Communication Programme Targets that we will be using to help pupils, students and staff remember the rules we need to follow to stay safe.
